Summer Snapshots

5th grade art classes.

First Water Day of 2026!

Cooking with UGA Extension.

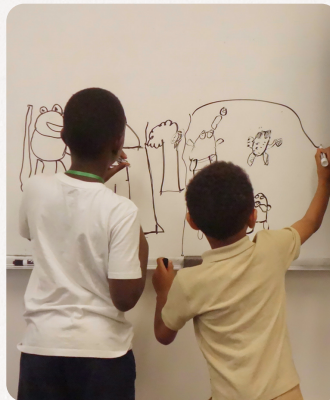

2nd grade writing and phonics.

3D printing with ASLA.

Students love soccer!

Creativity is everywhere.

We practice teamwork everyday!

We are halfway through our seven-week intensive summer camp!

SmarterMe® Summer programming provides students with comprehensive academic, social emotional, and extracurricular support. Students participate in math, reading, writing, phonics, social emotional learning, gardening, and organized physical activities to support physical and emotional health. We keep students curious and engaged with fun activities like 3D printing, art, music, cooking, dance, soccer, STEM, and career exploration workshops.

Summer programming is made possible by our wonderful tutors, volunteers, and teachers, along with our partnerships with UGA Extension, Global Learning Initiative, the Atlanta Student Leadership Association, Proximity Gap Network, and Perimeter Church which allow us to provide our students with transportation, free meals, laughter, and learning!
